LP	PART	QTY	IMAGE
1	Left Basket	1	
2	BOX-WRN-JL Spacer	1	

🔧 List of necessary tools¹:

- T-50 Torx

¹ NOTE: The tools **are not** included in the set.

BISON GEAR

Installation:

The installation of the basket is a very simple thing to do.

1. Unscrew **the two front screws of the hardtop** until there is a gap **about 4 mm** between the flat washer and hard top.
2. Slide the basket under the bolts and tighten them.

IMPORTANT!

The installation kit contains the aluminum spacer. If you have or plan to have a **Bison Gear Internal MOLLE Panel** to your Jeep Wrangler, you will need to mount the **window lower bracket** on the top of the basket using the same bolts.

To install it horizontally, you will need to **place the spacer under the last bolt**. In this way you will make a one surface with the basket.

Make sure that everything is mounted properly, and all the bolts are tightened. If it everything is correct, your work is done.

After driving 50 km, check all the bolts and re-tighten them if necessary.
