BISON GEAR

Installation:

The mounting platform can be assembled in two ways - using the bracket outside or the inside. Choose the option that best suits your configuration. The instruction below describes both method and installation to the roof shelf.

Follow the steps below to install product correctly:

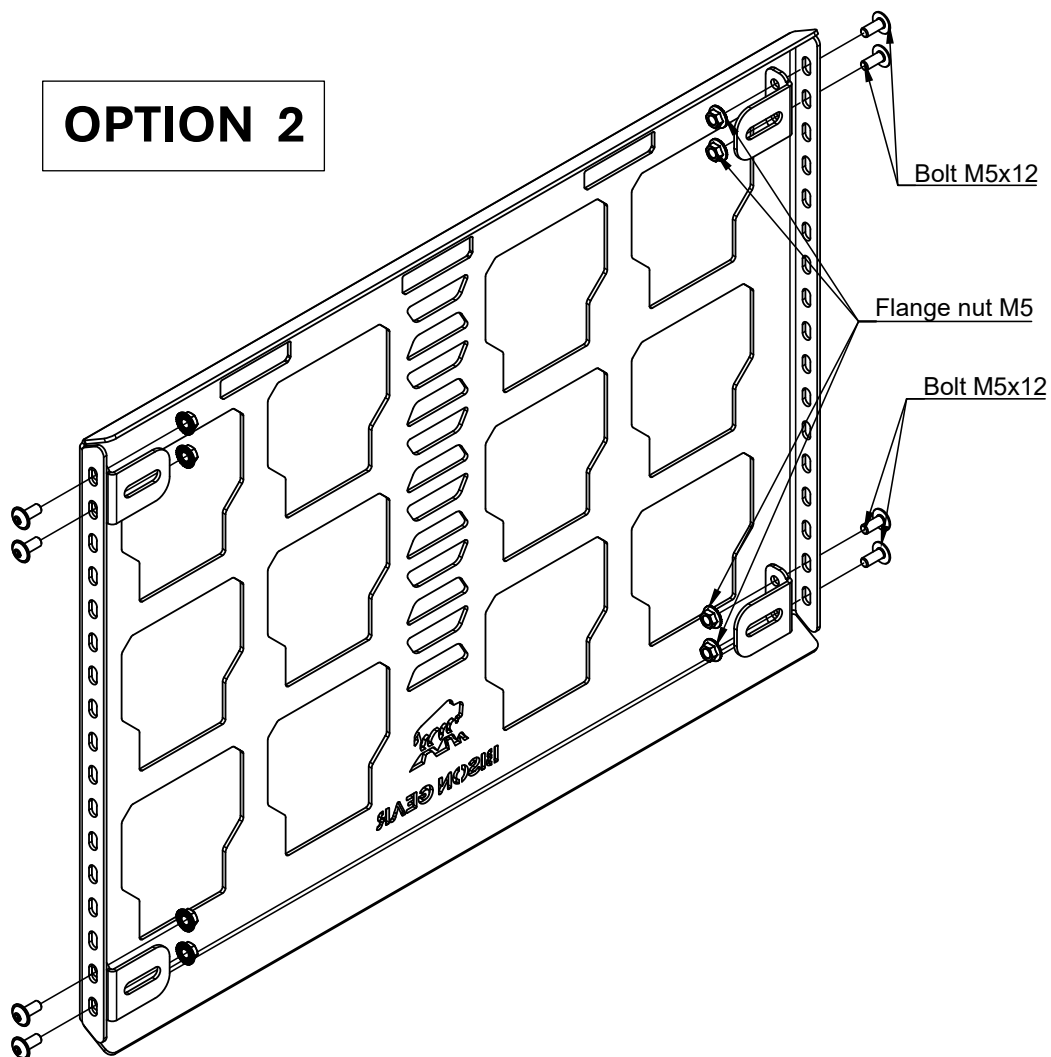

1. Start by preparing the product parts and gathering the necessary tools.
2. Assemble together mounting panel and side L-brackets together using M5x12 flange bolt and M5 nuts. Diagrams below shows two configurations – choose the best option for you.

BISON GEAR

OPTION 2

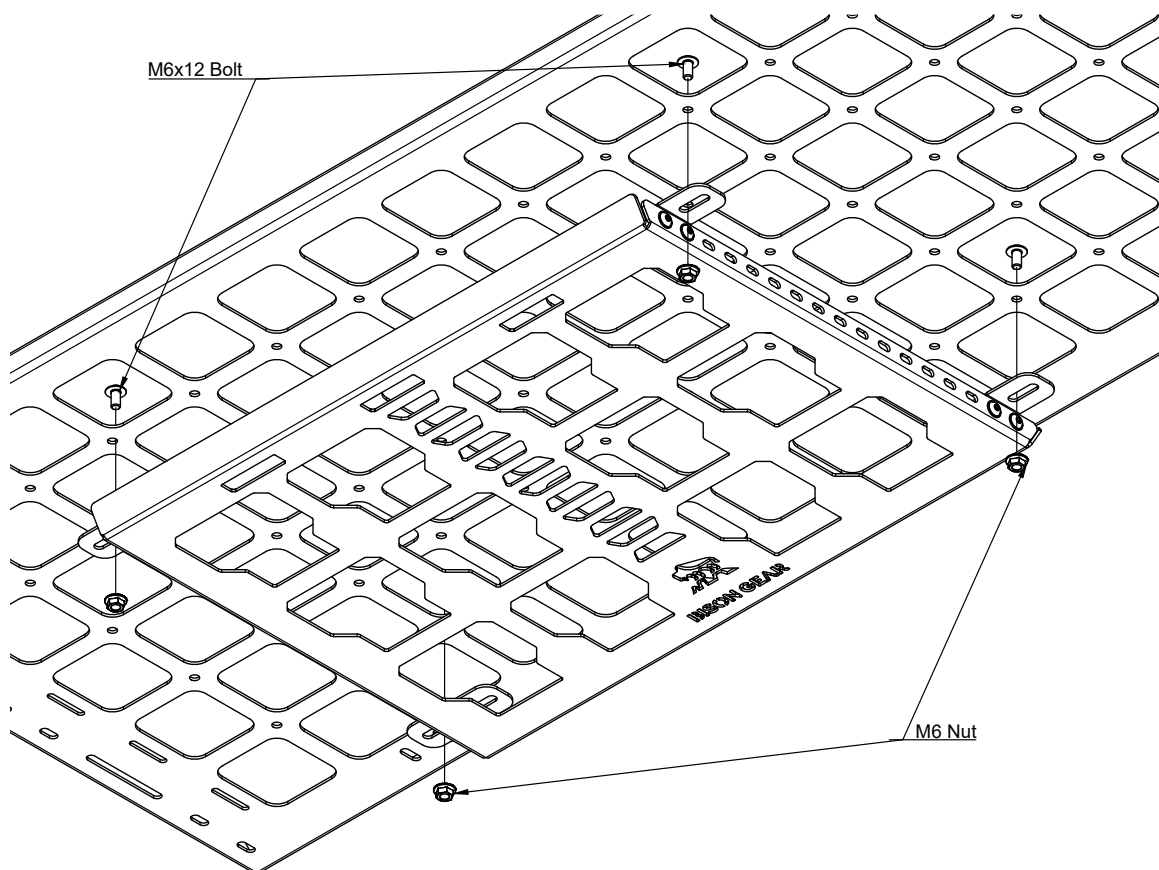

Before mounting the L-brackets, choose the most suitable position. The brackets can be installed along the short side of the platform.

BISON GEAR

3. Screw the mounting platform to the roof shelf using M6x12 flange bolt and M6 nuts - according to the diagram below.

4. Tighten all the bolts.

Make sure that everything is mounted properly, and all the bolts are tightened. If everything is correct, your work is done.

After driving 50km, check all the bolts and retighten them if necessary.
