Shelf - Diagram

⚙️ Installation:

Before you start to work, familiarize with the **Diagram on page 4**. There is an exploded view that shows you how to assemble the shelf parts together. Follow the steps below to the product correctly:

1. Start by preparing the product parts and gathering the necessary tools.
2. Screw **the front panel** and **the shelf** together using M5x12 flange bolts and M5 flange nuts.
- !!! The shelf is mounted in the trunk (under the roof) of the car in place of the top handle.
3. Unscrew the upper handle on the left and right side of the car.
4. Pre-screw **the shelf bracket** using **M6x30 flange bolts**.
5. Place the previously prepared **shelf** on the brackets.
6. Pre-screw the shelf using **M6x12 bolts** and **M6 nuts**.
7. Adjust the position of the shelf.
8. Tighten all the bolts and nuts.

Make sure that everything is mounted properly, and all the bolts are tightened. If it everything is correct, your work is done.

After driving 50km, check all the bolts and re-tighten them if necessary.
