BISON GEAR

Installation:

The Universal Wheel Mount is the ideal overlanding solution for any 4x4 vehicle - transforming your spare wheel into a secure mounting point for essential off-road accessories. It helps you organize gear, save space and keep everything important within easy reach.

To attach the universal wheel mount, a strap is required to ensure a solid connection. Place the mount on the wheel, hook the strap to one end of the mount, wrap it around the wheel, then hook the second end of the strap and tighten it using the strap tensioner.

Remember to first screw the accessories into the wheel mount and then place the mount on the wheel.

The link below link to video tutorial which shows the installation process.

Make sure that everything is mounted properly, and all the bolts are tightened.
If everything is correct, your work is done.

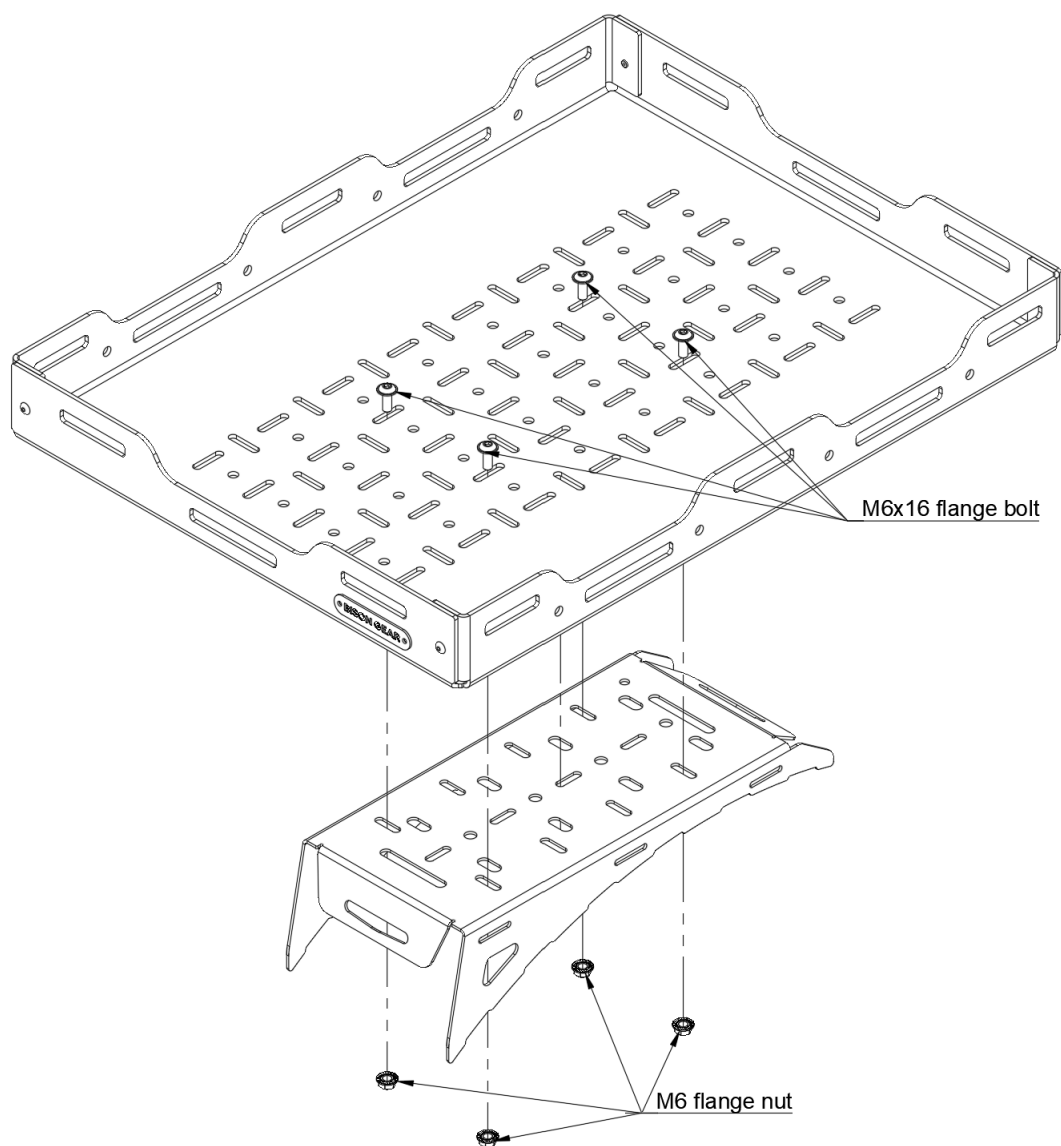

After driving 50km, check all the bolts and retighten them if necessary.
