## Installation:

YAK Bison Gear Chair Mount is a clever storage solution that keeps your YAK Chair secure, organized and always within reach. Mounted to the expedition shelf, it helps save valuable trunk space and keeps your chair ready for every off-road stop, campsite break, or overlanding adventure.

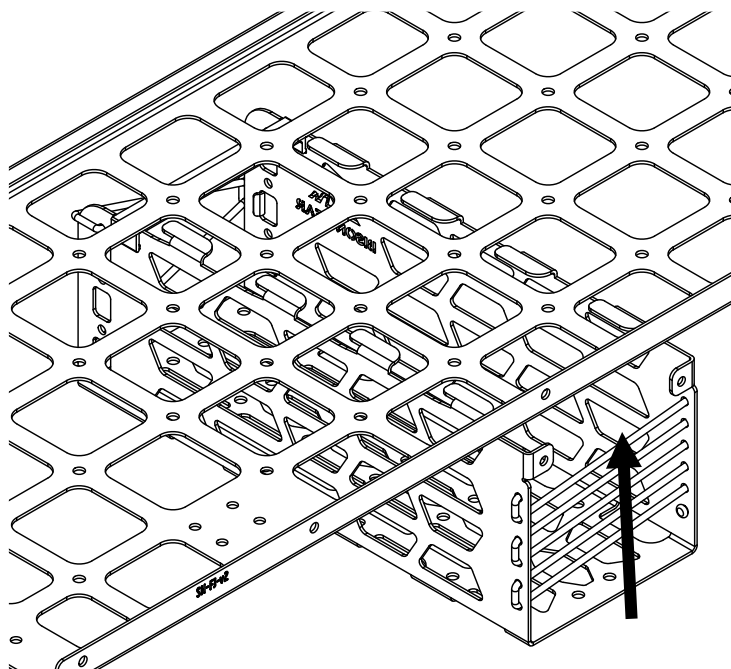

The instruction below describes how to mount the holder to the shelf and how to stack it together, which helps to save space.

Follow the steps below to install product correctly:

1. Start by preparing the product parts and gathering the necessary tools.
2. First, choose the position of the bracket on the shelf. Try the holder in several positions on the shelf to choose the best one for you.

The mounting process need to hook the holder's hooks on the shelf at first and then secure it using the bracket and fasteners from the installation kit.

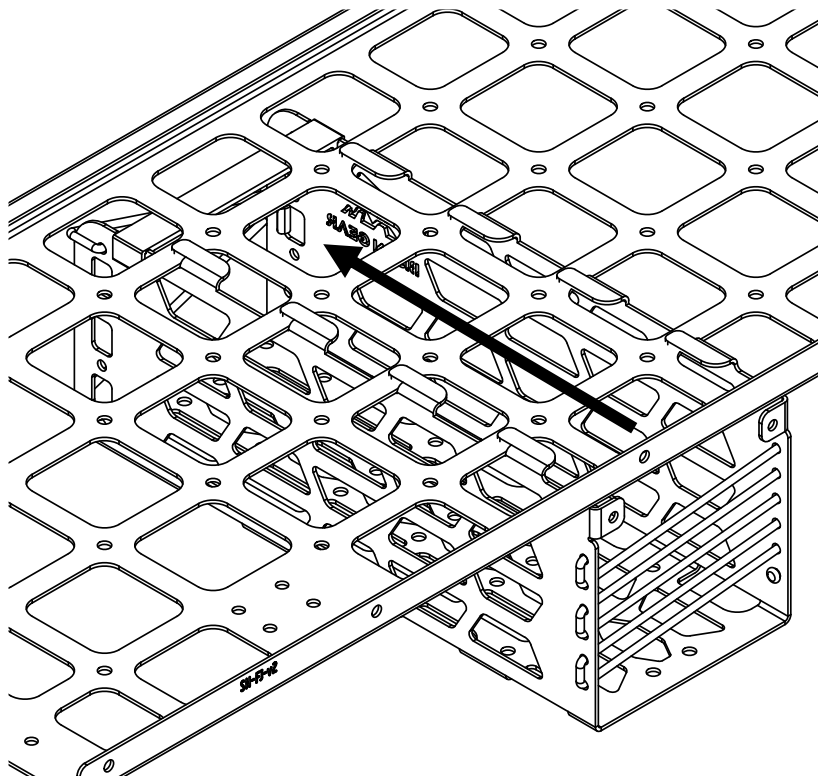

3. Place the holder's hook under the shelf into the square holes.

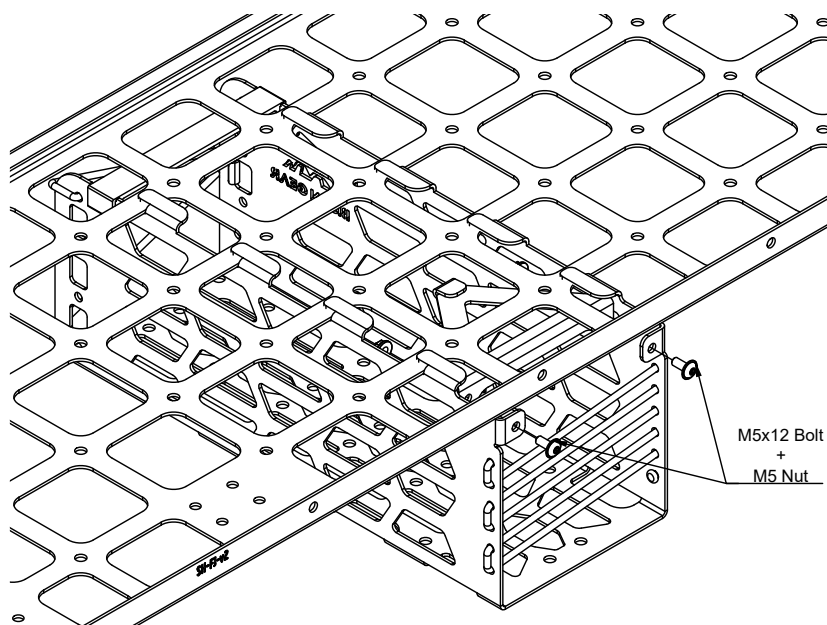

**BISON GEAR**

4. Slide the holder back under the shelf. (The hooks have to hook on the shelf)

5. Place the secure bracket inside the holder and under the shelf. The bracket's hook need to be hook on the shelf rib and then secure by M5x12 bolts and nuts.

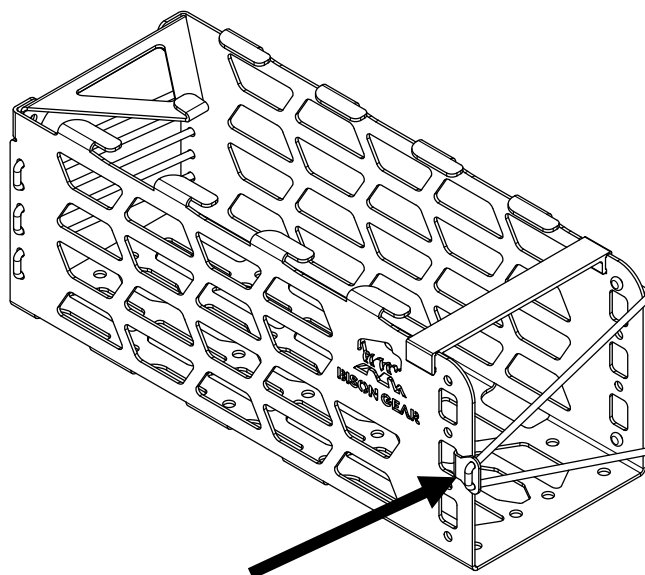

### Correctly mounted holder

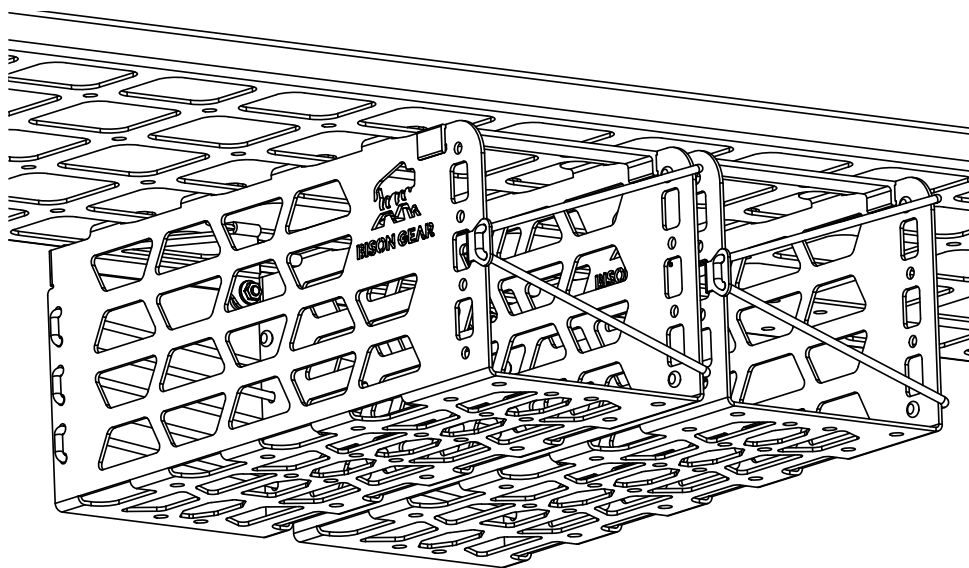

**BISON GEAR**

7. To place the chair inside the holder – unhook the front rubber cord with hook and place inside the chair. Secure the Yak Chair by front rubber cord.

It is possible to stack the holders horizontally – mount another one next to it, following the same installation process as for the first one. It is also possible to stack the holders vertically – mount the second holder underneath the first one.

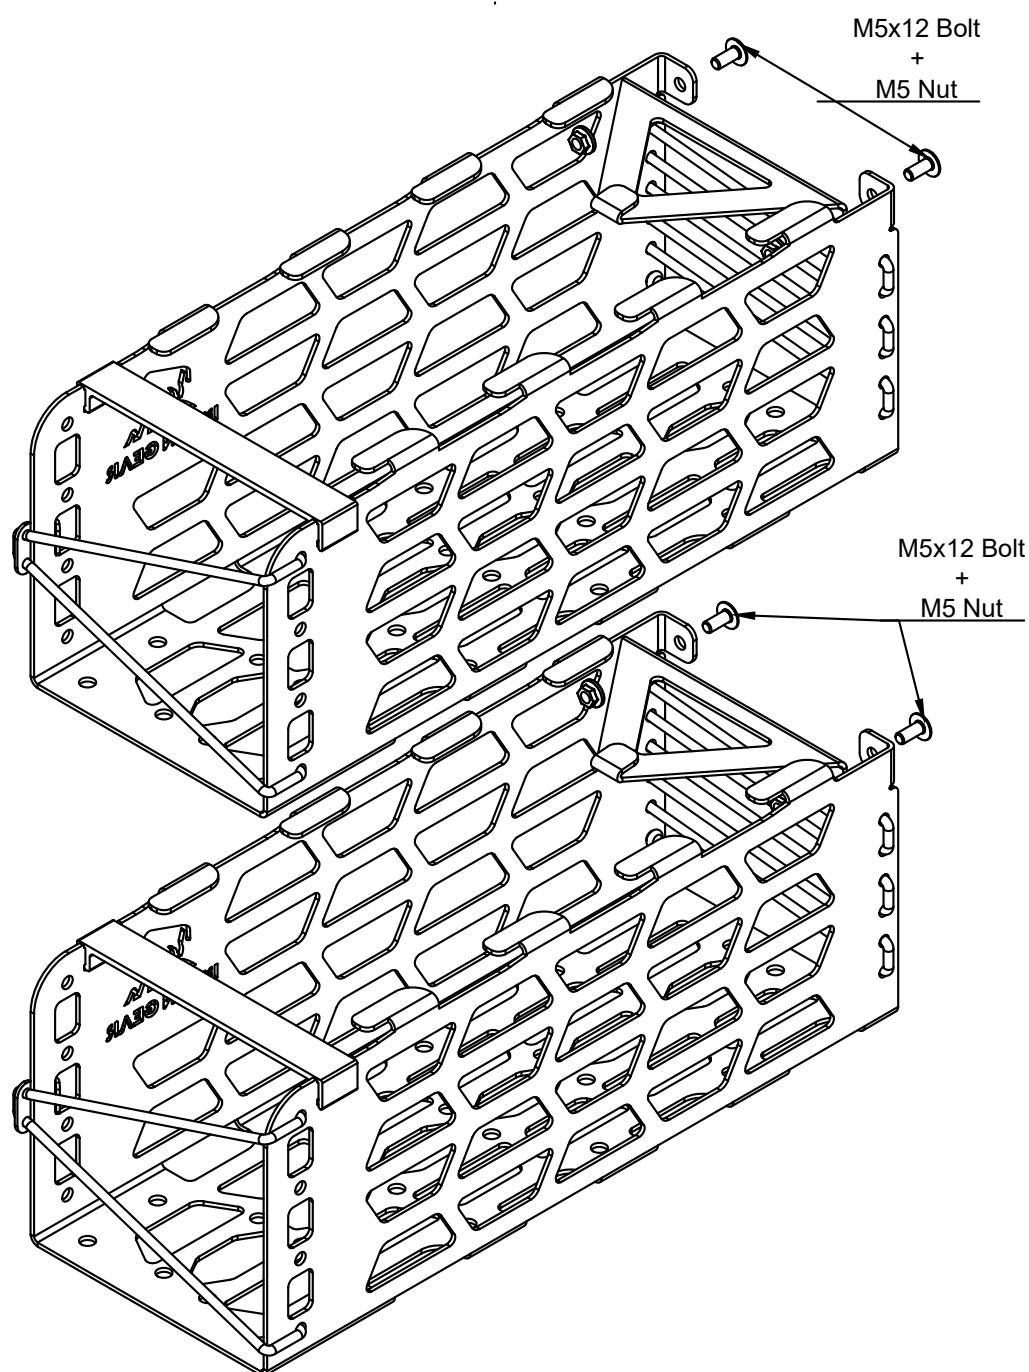

**Correctly mounted holders horizontally.**

**BISON GEAR**

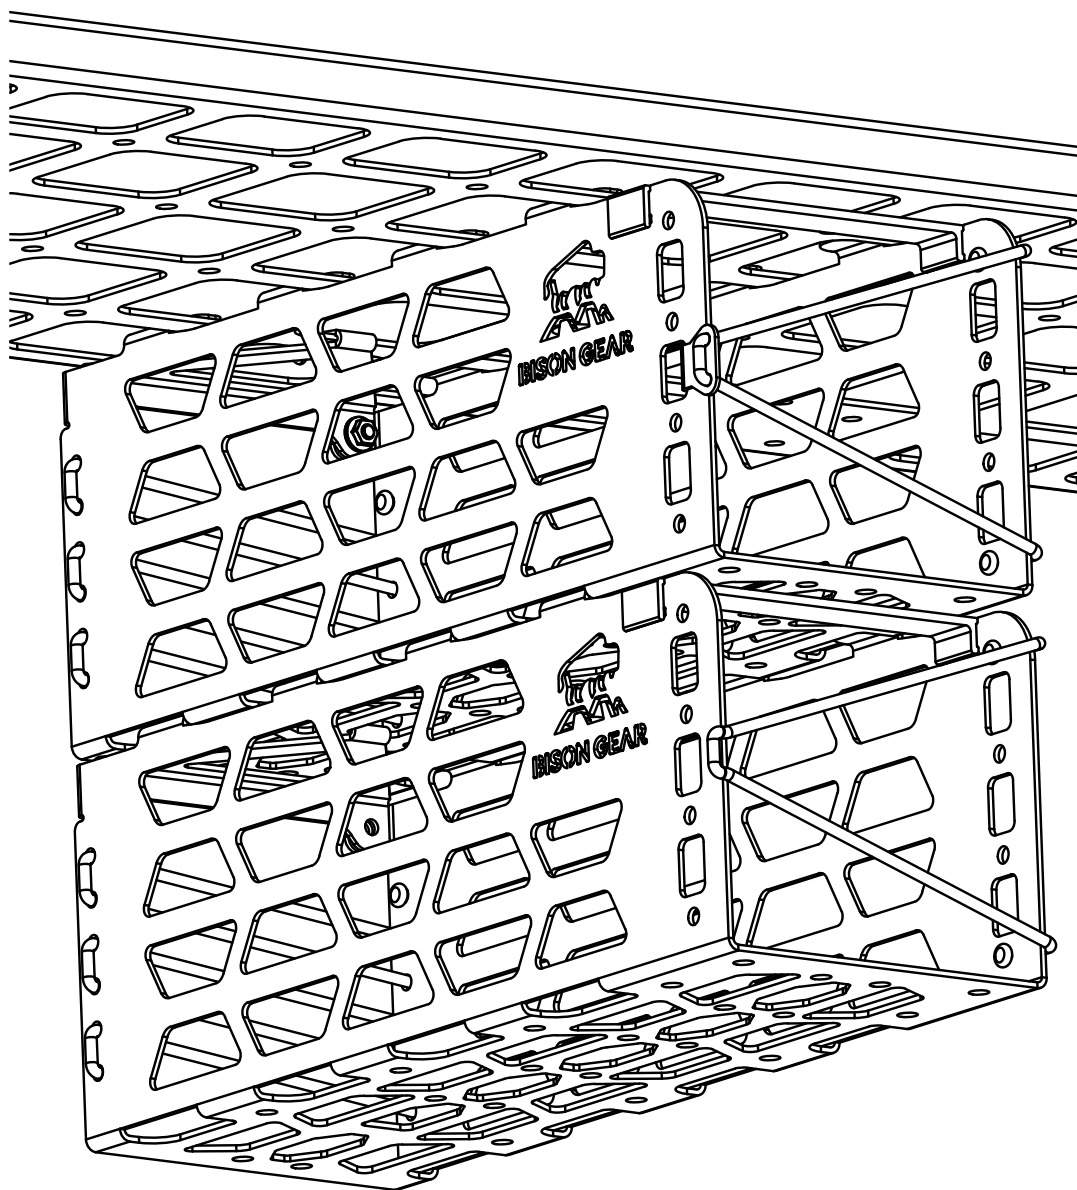

The holder has a specially designed hole pattern on the bottom, which allows you to connect a second one beneath it in the same way. Place the hooks of the second holder into the bottom holes of the first holder and slide them together. Secure the second holder in the same way as in step 5, using the bracket, bolts and nuts.

**BISON GEAR**

**Correctly mounted holders vertically.**

Make sure that everything is mounted properly, and all the bolts are tightened. If everything is correct, your work is done.

**After driving 50km, check all the bolts and retighten them if necessary.**
